Alaska Department of Environmental Conservation
MSGP Annual Reporting Form

Section I. General Information

Facility Name	APDES Permit Tracking Number
ANCHORAGE MAINTANCE STATION	AKS-052558

Facility Physical Address

Street	City	State	Zip Code
5300 e tudor rd	Anchorage	Alaska	99507

Contact Person	Title	Phone	Email
Taylor Jernigan	SWPP inspector	440 8450	Taylor.Jernigan@alask.gov

Lead Inspector's Name	Additional Inspector's Name	Additional Inspector's Name	Inspection Date
-			4.26.22

Section II. General Inspection Findings

1. As part of this comprehensive site inspection, did you inspect all potential pollutant sources, including areas where industrial activity may be exposed to storm water? [X] Yes [ ] No

   If NO, describe why not:

***Note**: Complete Section III of this form for each industrial activity area inspected and included in your SWPPP or as newly defined, in Section II parts 2 and 3 below, where pollutants may be exposed to storm water.*

2. Did this inspection identify any storm water or non-storm water outfalls not previously identified in your SWPPP? [ ] Yes [X] No

   If YES, for each location, describe the sources of those storm water and non-storm water discharges and any associated control measures in place:

3. Did this inspection identify any sources of storm water or non-storm water discharges not previously identified in your SWPPP? ☐ Yes ☒ No

If YES, describe these sources of storm water or non-storm water pollutants expected to be present in these discharges, and any control measures in place:

4. Did you review storm water monitoring data as part of this inspection to identify potential pollutant hotspots? ☐ Yes ☒ No ☒ NA, no monitoring performed

If YES, summarize the findings of that review and describe any additional inspection activities resulting from this review:

5. Describe any evidence of pollutants entering the drainage system or discharging to surface waters, and the condition of and around outfalls, including flow dissipation measure to prevent scouring:

Not Water to Sample

6. Have you taken or do you plan to take corrective actions, as specified in Part 8 of the permit, since your last annual report submission (or since you received authorization to discharge under this permit if this is your first annual report), including any corrective actions identified as a result of this annual comprehensive site inspection? ☐ Yes ☒ No

If YES, how many conditions requiring review for corrective action as specified in Parts 8.1 and 8.2 of the MSGP were addressed by these corrective actions? —

***Note**: Complete the attached Corrective Action Form (Section IV) for each condition identified, including any conditions identified as a result of this comprehensive storm water inspection.*

Section III. Industrial Activity Area Specific Findings

Complete one block for each industrial activity area where pollutants may be exposed to storm water. *Copy this page for additional industrial activity areas. In reviewing each area, you should consider:*

- *Industrial materials, residue, or trash that may have or could come into contact with storm water;*
- *Leaks or spills from industrial equipment, drums, tanks, and other containers;*
- *Offsite tracking of industrial or waste materials from areas of no exposure to exposed areas; and*
- *Tracking or blowing of raw, final, or waste material from areas of no exposure to exposed areas.*

Industrial Activity Area: Station Yard

1. Brief Description:

Fuel Storage area, truck parking, equipment parking

2. Are any control measures in need of maintenance or repair?	☐ Yes	☒ No
3. Have any control measures failed and require replacement?	☐ Yes	☒ No
4. Are any additional/revised control measures necessary in this area?	☐ Yes	☒ No

If YES, to any of these three questions, provide a description of the problem: *(Any necessary corrective actions should be described on the attached Corrective Action Form.)*

Industrial Activity Area:

1. Brief Description:

2. Are any control measures in need of maintenance or repair?	☐ Yes	☐ No
3. Have any control measures failed and require replacement?	☐ Yes	☐ No
4. Are any additional/revised control measures necessary in this area?	☐ Yes	☐ No

If YES, to any of these three questions, provide a description of the problem: *(Any necessary corrective actions should be described on the attached Corrective Action Form.)*

Industrial Activity Area:

1. Brief Description:

2. Are any control measures in need of maintenance or repair?	☐ Yes	☐ No
3. Have any control measures failed and require replacement?	☐ Yes	☐ No
4. Are any additional/revised control measures necessary in this area?	☐ Yes	☐ No

If YES, to any of these three questions, provide a description of the problem: *(Any necessary corrective actions should be described on the attached Corrective Action Form.)*

Industrial Activity Area:

1. Brief Description:

2. Are any control measures in need of maintenance or repair?	☐ Yes	☐ No
3. Have any control measures failed and require replacement?	☐ Yes	☐ No
4. Are any additional/revised control measures necessary in this area?	☐ Yes	☐ No

If YES, to any of these three questions, provide a description of the problem: *(Any necessary corrective actions should be described on the attached Corrective Action Form.)*

Section IV. Corrective Actions

Complete this page for each specific condition requiring a corrective action or a review determining that no corrective action is needed. Copy this page for additional corrective actions or reviews.

Include both corrective actions that have been initiated or completed since the last annual report, and future corrective actions needed to address problems identified in the comprehensive storm water inspection. Include an update on any outstanding corrective actions that had not been completed at the time of your previous annual report.

1. Corrective Action # 0 of 0 for this reporting period.

2. Is this corrective action:
   - ☐ An update on a corrective action from a previous annual report; or
   - ☐ A new corrective action?

3. Identify the condition(s) triggering the need for this review:
   - ☐ Unauthorized release of discharge
   - ☐ Numeric effluent limitation exceedance
   - ☐ Control measures inadequate to meet applicable water quality standards
   - ☐ Control measures inadequate to meet non-numeric effluent limitations
   - ☐ Control measures not properly operated or maintained
   - ☐ Change in facility operations necessitated change in control measures
   - ☐ Average benchmark value exceedance
   - ☐ Other (describe):

4. Briefly describe the nature of the problem identified:

5. Date problem identified:

6. How problem was identified:
   - ☐ Comprehensive site inspection
   - ☐ Quarterly visual assessment
   - ☐ Routine facility inspection
   - ☐ Notification by EPA or DEC
   - ☐ Other (describe):

7. Description of corrective action(s) taken or to be taken to eliminate or further investigate the problem (e.g., describe modifications or repairs to control measures, analysis to be conducted, etc.) or if no modification is needed, basis for that determination.

8. Did/will this corrective action require modification of your SWPPP? ☐ Yes ☐ No

9. Date corrective action initiated:

10. Date corrective action completed: Or expected to be completed:

11. If corrective action not yet completed, provide the status of the corrective action as the time of the comprehensive site inspections and describe any remaining steps (including timeframes associated with each step) necessary to complete the corrective action:

Section V. Annual Report Certification

Compliance Certification

Do you certify that your annual inspection has met the requirements of Part 6.3 of the permit, and that, based upon the results of this inspection, to the best of your knowledge, you are in compliance with the permit? [X] Yes [ ] No

If NO, summarize why you are not in compliance with the permit:

Annual Report Certification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those person directly responsible for gathering the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Anchorage Maintenance Station Annual SPCC Inspection

The annual inspection must be completed each year with an individual evaluation of each storage tank. Deficiencies are to be addressed promptly. Provide further description and comments, if necessary, on a separate sheet of paper and attach to this sheet. The inspection checklist is to be kept with the SPCC plan.

Date: 4-26-22	**Time:** 11:30	**Inspector:** Taylor Jernigan

✓ = Satisfactory N/A = Not Applicable R = Repair required

	Facility Drainage		**Training**
✓	No trash or debris under or near tank(s)	✓	New employees trained on spill prevention & response
✓	No erosion or stressed/dead vegetation under or near tank(s)	✓	All SPCC-related trainings are properly recorded
✓	No standing water under or around tank(s)		
✓	No woody vegetation under or near tanks		
✓	No sheen where water goes off-site		

	Security		**Fuel Transfer Area**
✓	Fence, gates, and locks operational, if any	✓	Emergency shut off valve operational (test)
✓	Bollards/tank barriers not damaged	✓	Concrete or secondary containment is under tank dispenser(s)
✓	Tank dispenser(s) locked or starter controls turned off when tank is not in use	✓	No leaks or cracks in dispenser hose(s) or handle(s)
✓	Lighting is working properly	✓	No new staining or oil sheen on ground (if sheen, wipe up with an absorbent pad)
✓	Sign on fence to keep out trespassers is legible		

	Indoor Storage Areas
✓	No spotting or staining on floor (clean-up if present); place pads under all dispensers
✓	All containers are labeled properly (contents)
✓	Drum storage has secondary containment with no liquid or debris
✓	Floors are clean and free of debris
✓	Lids on drums are securely closed (must be closed unless actively being used)
✓	No open containers with fluid in them
✓	Oil/Water separator does not have heavy oil sheen (use absorbent pads to remove)

Comments:

Above Ground Storage Tank #1 (10,000 gallon)	
✓	Tank surfaces checked for signs of leakage or drips
✓	Tank is not damaged, significantly rusted, or deteriorated
✓	Bolts, rivets, pipes, seams, and hoses are not damaged, cracked, or significantly rusted
✓	No leaks at valves, flanges, seals or other tank fittings
✓	Tank foundation checked for cracks, erosion, settling, deterioration, buckling, or damage
✓	Vent(s) not obstructed
✓	Level gauges and alarms tested and operative
✓	Tank contents clearly labeled on tank
✓	Tank fluid quantity clearly labeled (e.g. '10,000 gallons')
✓	Hazard placards are intact and readable
✓	Tank marked with a distinctive, legible number (e.g. #1)

Above Ground Storage Tank #2 (120 gallon)	
✓	Tank surfaces checked for signs of leakage or drips
✓	Tank is not damaged, significantly rusted, or deteriorated
✓	Bolts, rivets, pipes, seams, and hoses are not damaged, cracked, or significantly rusted
✓	No leaks at valves, flanges, seals or other fittings connecting to tank
✓	Pressure gauge operative
✓	Vent(s) not obstructed
✓	Tank contents clearly labeled on tank
✓	Tank fluid quantity clearly labeled (e.g. '10,000 gallons')
✓	Hazard placards are intact and readable
✓	Tank marked with a distinctive, legible number (e.g. #1)

Above Ground Storage Tank #3 (107 gallon)	
✓	Tank surfaces checked for signs of leakage or drips
✓	Tank is not damaged, significantly rusted, or deteriorated
✓	Bolts, rivets, pipes, seams, and hoses are not damaged, cracked, or significantly rusted
✓	No leaks at valves, flanges, seals or other fittings connecting to tank
✓	Pressure gauge operative
✓	Vent(s) not obstructed
✓	Tank contents clearly labeled on tank
✓	Tank fluid quantity clearly labeled (e.g. '10,000 gallons')
✓	Hazard placards are intact and readable
✓	Tank marked with a distinctive, legible number (e.g. #1)

Above Ground Storage Tank #4 (multi-fluid)	
✓	Tank surfaces checked for signs of leakage or drips
✓	Tank is not damaged, significantly rusted, or deteriorated
✓	Bolts, rivets, pipes, seams, and hoses are not damaged, cracked, or significantly rusted
✓	No leaks at valves, flanges, seals or other fittings connecting to tank
✓	Tank foundation checked for cracks, erosion, settling, deterioration, or damage
✓	Tank contents clearly labeled on tank
✓	Tank fluid quantity clearly labeled (e.g. '300 gallons')
✓	Hazard placards are intact and readable
✓	Tank marked with a distinctive, legible number (e.g. #4)

Remarks:

#5 55 Gallon Drums		Hazardous Waste Storage Area (HWSA) - fill out only if storing hazardous waste	
√	Drum surfaces checked for signs of leakage or drips (no significant rusting, corrosion, discoloration, etc.)	√	Containers on secondary containment (concrete pad or portable plastic containment)
G	General drum condition (F) fair, (G) good or (E) excellent	√	Hazardous Waste Determination Forms current, if storing hazardous waste
√	Lids on drums are securely closed (must be closed unless actively being used)	√	Containers marked properly (material type and date)
√	Drum storage has secondary containment with no liquid or debris	√	Lids securely on containers unless they are being actively used
√	Drums stored inside or under cover	√	36 inches between containers
√	Used fluids being disposed of regularly (not an excess of drums in the facility)	√	Containers not rusted through, cracked, or have holes
√	All containers are marked properly (with contents and date filled)	N/A	Manifest Log is current (if transporting hazardous waste)
		√	Limited access sign readable
		√	HWSA Log current
		√	HWSA is secure (fenced and/or locked)

MS4 TRAINING RECORD

Record any instances of training or meetings related to storm water and SWPPP management. Training needs to be on going, is required at least annually, and must be documented in the SWPPP to meet permit requirements.

Qualified personal must complete at least one of the following MS4 trainings:

- AK-CESCL certified;
- EPA MSGP online training; or
- DOT&PF T2 MSGP training for airports

Date	May 12, 2022	**Trainer**	Renée Goentzel
Name of Training	M&O Environmental Compliance – SWPPPs, the SPCC Rule, RCRA, and permits		

Training Topics (check as appropriate)

- ☒ **Good Housekeeping Control Measures**
- ☒ **Spill Prevention and Response**
- ☐ **Erosion and Sediment Control Measures**
- ☐ **Runoff Management Control Measures**
- ☐ **Inspections**
- ☐ **Reporting and Recordkeeping**
- ☒ **SWPPP**
- ☐ **Maintenance of Equipment or Control Measures**
- ☒ **Other (describe)** **The Clean Water Act, SWPPP compliance tips, and BMPs**

Appendix D – Record of Annual Discharge Prevention Briefings and Trainings

Briefings will be scheduled and conducted for operating personnel at regular intervals to ensure adequate understanding of this SPCC plan. The briefings will also highlight and describe known discharge events or failures, malfunctioning components, and recently implemented precautionary measures and best practices. Personnel will also be instructed in operation and maintenance of equipment to prevent the discharge of oil, and in applicable pollution laws, rules, and regulations. Facility operators and other personnel will have an opportunity during the briefings to share recommendations concerning health, safety, and environmental issues encountered during facility operations.

Section II. General Inspection Findings

1. As part of this comprehensive site inspection, did you inspect all potential pollutant sources, including areas where industrial activity may be exposed to storm water? ☒ Yes ☐ No
   If NO, describe why not:

***Note**: Complete Section III of this form for each industrial activity area inspected and included in your SWPPP or as newly defined, in Section II parts 2 and 3 below, where pollutants may be exposed to storm water.*

2. Did this inspection identify any storm water or non-storm water outfalls not previously identified in your SWPPP? ☐ Yes ☒ No
   If YES, for each location, describe the sources of those storm water and non-storm water discharges and any associated control measures in place:

3. Did this inspection identify any sources of storm water or non-storm water discharges not previously identified in your SWPPP? ☐ Yes ☒ No
   If YES, describe these sources of storm water or non-storm water pollutants expected to be present in these discharges, and any control measures in place:

4. Did you review storm water monitoring data as part of this inspection to identify potential pollutant hotspots? ☐ Yes ☒ No ☒ NA, no monitoring performed
   If YES, summarize the findings of that review and describe any additional inspection activities resulting from this review:

5. Describe any evidence of pollutants entering the drainage system or discharging to surface waters, and the condition of and around outfalls, including flow dissipation measure to prevent scouring:
   No water

6. Have you taken or do you plan to take corrective actions, as specified in Part 8 of the permit, since your last annual report submission (or since you received authorization to discharge under this permit if this is your first annual report), including any corrective actions identified as a result of this annual comprehensive site inspection? ☐ Yes ☒ No
   If YES, how many conditions requiring review for corrective action as specified in Parts 8.1 and 8.2 of the MSGP were addressed by these corrective actions? —

***Note**: Complete the attached Corrective Action Form (Section IV) for each condition identified, including any conditions identified as a result of this comprehensive storm water inspection.*

Section III. Industrial Activity Area Specific Findings

Complete one block for each industrial activity area where pollutants may be exposed to storm water. *Copy this page for additional industrial activity areas. In reviewing each area, you should consider:*

- *Industrial materials, residue, or trash that may have or could come into contact with storm water;*
- *Leaks or spills from industrial equipment, drums, tanks, and other containers;*
- *Offsite tracking of industrial or waste materials from areas of no exposure to exposed areas; and*
- *Tracking or blowing of raw, final, or waste material from areas of no exposure to exposed areas.*

Industrial Activity Area: Birchwood Yard

1. Brief Description:

fuel area, Parking for trucks, equipment parking.

2. Are any control measures in need of maintenance or repair?	☐ Yes	☒ No
3. Have any control measures failed and require replacement?	☐ Yes	☒ No
4. Are any additional/revised control measures necessary in this area?	☐ Yes	☒ No

If YES, to any of these three questions, provide a description of the problem: *(Any necessary corrective actions should be described on the attached Corrective Action Form.)*

Industrial Activity Area:

1. Brief Description:

2. Are any control measures in need of maintenance or repair?	☐ Yes	☒ No
3. Have any control measures failed and require replacement?	☐ Yes	☒ No

Girdwood SPCC Annual Inspection

The annual inspection must be completed each year with an individual evaluation of each storage tank. Deficiencies are to be addressed promptly. Provide further description and comments, if necessary, on a separate sheet of paper and attach to this sheet. The inspection checklist is to be kept with the SPCC plan.

Date: 4/27/2022	**Time:** 10:30 AM	**Inspector:** Paul Berthold

✓ = Satisfactory N/A = Not Applicable R = Repair required

	Facility Drainage		**Training**
✓	No trash or debris under or near tank(s)	✓	New employees trained on spill prevention & response
✓	No erosion or stressed/dead vegetation under or near tank(s)	✓	All SPCC-related trainings are properly recorded
✓	No standing water under or around tank(s)		
✓	No woody vegetation under or near tanks		
✓	No sheen where water goes off-site		

	Security		**Fuel Transfer Area**
✓	Fence, gates, and locks operational, if any	✓	Emergency shut off valve operational (test)
✓	Bollards/tank barriers not damaged	✓	Concrete or secondary containment is under tank dispenser(s)
✓	Tank dispenser(s) locked or starter controls turned off when tank is not in use	✓	No leaks or cracks in dispenser hose(s) or handle(s)
✓	Lighting is working properly	✓	No new staining or oil sheen on ground (if sheen, wipe up with an absorbent pad)
✓	Sign on fence to keep out trespassers is legible		

	Indoor Storage Areas
✓	No spotting or staining on floor (clean-up if present); place pads under all dispensers
✓	All containers are labeled properly (contents)
✓	Drum storage has secondary containment with no liquid or debris
✓	Floors are clean and free of debris
✓	Lids on drums are securely closed (must be closed unless actively being used)
✓	No open containers with fluid in them
✓	Oil/Water separator does not have heavy oil sheen (use absorbent pads to remove)

Comments:

Above Ground Storage Tank #1 (4,000 gal.)	
✓	Tank surfaces checked for signs of leakage or drips
✓	Tank is not damaged, significantly rusted, or deteriorated
✓	Bolts, rivets, pipes, seams, and hoses are not damaged, cracked, or significantly rusted
✓	No leaks at valves, flanges, seals or other tank fittings
✓	Tank foundation checked for cracks, erosion, settling, deterioration, buckling, or damage
✓	Vent(s) not obstructed
✓	Level gauges and/or alarms tested and operative
✓	Tank contents clearly labeled on tank
✓	Tank fluid quantity clearly labeled (e.g. '10,000 gallons')
✓	Hazard placards are intact and readable
✓	Tank marked with a distinctive, legible number (e.g. #1)

Above Ground Storage Tank #2 (100 gal.)	
✓	Tank surfaces checked for signs of leakage or drips
✓	Tank is not damaged, significantly rusted, or deteriorated
✓	Bolts, rivets, pipes, seams, and hoses are not damaged, cracked, or significantly rusted
✓	No leaks at valves, flanges, seals or other tank fittings
✓	Vent(s) not obstructed
✓	Tank contents clearly labeled on tank
✓	Tank fluid quantity clearly labeled (e.g. '10,000 gallons')
✓	Hazard placards are intact and readable
✓	Tank marked with a distinctive, legible number (e.g. #1)
✓	Tank surfaces checked for signs of leakage or drips

Above Ground Storage Tank #3 (multi-fluid	
✓	Tank surfaces checked for signs of leakage or drips
✓	Tank is not damaged, significantly rusted, or deteriorated
✓	Bolts, rivets, pipes, seams, and hoses are not damaged, cracked, or significantly rusted
✓	No leaks at valves, flanges, seals or other fittings connecting to tank
✓	Tank foundation checked for cracks, erosion, settling, deterioration, or damage
✓	Tank contents clearly labeled on tank
✓	Tank fluid quantity clearly labeled (e.g. '300 gallons')
✓	Hazard placards are intact and readable
✓	Tank marked with a distinctive, legible number (e.g. #4)

#4 55 Gallon Drums (main shop)	
✓	Drum surfaces checked for signs of leakage or drips (no significant rusting, corrosion, discoloration, etc.)
G	General drum condition (F) fair, (G) good or (E) excellent
✓	Lids on drums are securely closed (must be closed unless actively being used)
✓	Drum storage has secondary containment with no liquid or debris
✓	Drums stored inside or under cover
✓	Used fluids being disposed of regularly (not an excess of drums in the facility)
✓	All containers are marked properly (with contents and date filled)

Comments:

#5 55 Gallon Drums (Quonset Hut)		Hazardous Waste Storage Area (HWSA) - fill out only if storing hazardous waste	
✓	Drum surfaces checked for signs of leakage or drips (no significant rusting, corrosion, discoloration, etc.)	✓	Containers on secondary containment (concrete pad or portable plastic containment)
✓	General drum condition (F) fair, (G) good or (E) excellent	✓	Hazardous Waste Determination Forms current, if storing hazardous waste
✓	Lids on drums are securely closed (must be closed unless actively being used)	✓	Containers marked properly (material type and date)
✓	Drum storage has secondary containment with no liquid or debris	✓	Lids securely on containers unless they are being actively used
✓	Drums stored inside or under cover	✓	36 inches between containers
✓	Used fluids being disposed of regularly (not an excess of drums in the facility)	✓	Containers not rusted through, cracked, or have holes
✓	All containers are marked properly (with contents and date filled)	✓	Manifest Log is current (if transporting hazardous waste)
		✓	Limited access sign readable
		N/A	HWSA Log current
		N/A	HWSA is secure (fenced and/or locked)

Section II. General Inspection Findings

1. As part of this comprehensive site inspection, did you inspect all potential pollutant sources, including areas where industrial activity may be exposed to storm water? ☒ Yes ☐ No

   If NO, describe why not:

***Note**: Complete Section III of this form for each industrial activity area inspected and included in your SWPPP or as newly defined, in Section II parts 2 and 3 below, where pollutants may be exposed to storm water.*

2. Did this inspection identify any storm water or non-storm water outfalls not previously identified in your SWPPP? ☐ Yes ☒ No

   If YES, for each location, describe the sources of those storm water and non-storm water discharges and any associated control measures in place:

3. Did this inspection identify any sources of storm water or non-storm water discharges not previously identified in your SWPPP? ☐ Yes ☒ No

   If YES, describe these sources of storm water or non-storm water pollutants expected to be present in these discharges, and any control measures in place:

4. Did you review storm water monitoring data as part of this inspection to identify potential pollutant hotspots? ☐ Yes ☐ No ☒ NA, no monitoring performed

   If YES, summarize the findings of that review and describe any additional inspection activities resulting from this review:

5. Describe any evidence of pollutants entering the drainage system or discharging to surface waters, and the condition of and around outfalls, including flow dissipation measure to prevent scouring: N/A

6. Have you taken or do you plan to take corrective actions, as specified in Part 8 of the permit, since your last annual report submission (or since you received authorization to discharge under this permit if this is your first annual report), including any corrective actions identified as a result of this annual comprehensive site inspection? ☐ Yes ☒ No

   If YES, how many conditions requiring review for corrective action as specified in Parts 8.1 and 8.2 of the MSGP were addressed by these corrective actions?

***Note**: Complete the attached Corrective Action Form (Section IV) for each condition identified, including any conditions identified as a result of this comprehensive storm water inspection.*

Section III. Industrial Activity Area Specific Findings

Complete one block for each industrial activity area where pollutants may be exposed to storm water. *Copy this page for additional industrial activity areas. In reviewing each area, you should consider:*

- *Industrial materials, residue, or trash that may have or could come into contact with storm water;*
- *Leaks or spills from industrial equipment, drums, tanks, and other containers;*
- *Offsite tracking of industrial or waste materials from areas of no exposure to exposed areas; and*
- *Tracking or blowing of raw, final, or waste material from areas of no exposure to exposed areas.*

Industrial Activity Area: Southeast Corner

1. Brief Description:

The Southeast corner is the only outfall from the site. Water enters the outfall area and flows through wattles before entering the discharge culvert.

2. Are any control measures in need of maintenance or repair?	☐ Yes	☒ No
3. Have any control measures failed and require replacement?	☐ Yes	☒ No
4. Are any additional/revised control measures necessary in this area?	☐ Yes	☒ No

If YES, to any of these three questions, provide a description of the problem: *(Any necessary corrective actions should be described on the attached Corrective Action Form.)*

Industrial Activity Area: South end

1. Brief Description:

The Southend has no outfalls in this area. There is a berm as the BMP along the fence line. BMP is working well

2. Are any control measures in need of maintenance or repair?	☐ Yes	☒ No
3. Have any control measures failed and require replacement?	☐ Yes	☒ No
4. Are any additional/revised control measures necessary in this area?	☐ Yes	☒ No

If YES, to any of these three questions, provide a description of the problem: *(Any necessary corrective actions should be described on the attached Corrective Action Form.)*

Industrial Activity Area: Southwest Side

1. Brief Description:
Entrance to the facility and main traffic area. There is a berm and ditch along this area. The berm and ditch are working well.

2. Are any control measures in need of maintenance or repair?	☐ Yes	☒ No
3. Have any control measures failed and require replacement?	☐ Yes	☒ No
4. Are any additional/revised control measures necessary in this area?	☐ Yes	☒ No

If YES, to any of these three questions, provide a description of the problem: *(Any necessary corrective actions should be described on the attached Corrective Action Form.)*

Industrial Activity Area: Northend

1. Brief Description:
Supply Storage area and equipment parking area. The Northend has natural BMP's which consist of hillside. The BMP's are working well.

2. Are any control measures in need of maintenance or repair?	☐ Yes	☒ No
3. Have any control measures failed and require replacement?	☐ Yes	☒ No
4. Are any additional/revised control measures necessary in this area?	☐ Yes	☒ No

If YES, to any of these three questions, provide a description of the problem: *(Any necessary corrective actions should be described on the attached Corrective Action Form.)*

Section IV. Corrective Actions

Complete this page for each specific condition requiring a corrective action or a review determining that no corrective action is needed. Copy this page for additional corrective actions or reviews.

Include both corrective actions that have been initiated or completed since the last annual report, and future corrective actions needed to address problems identified in the comprehensive storm water inspection. Include an update on any outstanding corrective actions that had not been completed at the time of your previous annual report.

1. Corrective Action # 0 of 0 for this reporting period.

2. Is this corrective action:
   - ☐ An update on a corrective action from a previous annual report; or
   - ☐ A new corrective action?

3. Identify the condition(s) triggering the need for this review:
   - ☐ Unauthorized release of discharge
   - ☐ Numeric effluent limitation exceedance
   - ☐ Control measures inadequate to meet applicable water quality standards
   - ☐ Control measures inadequate to meet non-numeric effluent limitations
   - ☐ Control measures not properly operated or maintained
   - ☐ Change in facility operations necessitated change in control measures
   - ☐ Average benchmark value exceedance
   - ☐ Other (describe):

4. Briefly describe the nature of the problem identified:

5. Date problem identified:

6. How problem was identified:
   - ☐ Comprehensive site inspection
   - ☐ Quarterly visual assessment
   - ☐ Routine facility inspection
   - ☐ Notification by EPA or DEC
   - ☐ Other (describe):

7. Description of corrective action(s) taken or to be taken to eliminate or further investigate the problem (e.g., describe modifications or repairs to control measures, analysis to be conducted, etc.) or if no modification is needed, basis for that determination.

8. Did/will this corrective action require modification of your SWPPP? ☐ Yes ☐ No

9. Date corrective action initiated:

10. Date corrective action completed: Or expected to be completed:

11. If corrective action not yet completed, provide the status of the corrective action as the time of the comprehensive site inspections and describe any remaining steps (including timeframes associated with each step) necessary to complete the corrective action:

Section V. Annual Report Certification

Compliance Certification

Do you certify that your annual inspection has met the requirements of Part 6.3 of the permit, and that, based upon the results of this inspection, to the best of your knowledge, you are in compliance with the permit? ☒ Yes ☐ No

If NO, summarize why you are not in compliance with the permit:

Annual Report Certification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those person directly responsible for gathering the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
