FROM: MAYOR

SUBJECT: MULTI-AGENCY REPORT: TAKING ACTION TO PREVENT

**ROADWAY DEATHS, MONTH 6 UPDATE FOR MAY 2025.** 

6 Please find the attached Month-6 update report, which the Municipality of 7 Anchorage and the Alaska Department of Transportation and Public Facilities 8 jointly prepared to report on the status of actions our agencies committed to in our 9 previous reports (AIM 162-2024 and AIM 208-2024), and actions taken through 10

April 20, 2025, to reduce traffic fatalities and serious injuries as part of our commitment to Vision Zero. 12

Prepared by: Zak Hartman, P.E., Vision Zero Coordinator & Acting

Traffic Signals Manager

Brad Coy, P.E., PTOE, Municipal Traffic Engineer 16 Approved by: William D. Falsey, Chief Administrative Officer 17 Concur: Concur: Rebecca A. Windt Pearson, Municipal Manager 18

Respectfully submitted: Suzanne LaFrance, Mayor

# Taking Action to Prevent Roadway Deaths, Month 6 Update (April 2025)

It has now been six months since the Municipality of Anchorage (MOA) and Alaska Department of Transportation and Public Facilities (DOT&PF) submitted our October 8, 2024, report of the actions we had taken and were planning to take to prevent additional deaths on Anchorage roads.

This "Month 6 Update" explains the status of our actions through April 8, 2025, and includes:

- Actions previously reported as completed in the October 8, 2024, report or in the "Month 1
  Update (November 2024)" are shown but grayed out.
- Changes since the "Month 1 Update (November 2024)" and notes on status are provided in red. This includes revisions to actions, explanatory comments, and new related actions.
- Because Month 6 was not a previously anticipated reporting period and no report was prepared in Month 3, the headings have been changed as follows:
  - o "Actions To Be Taken in Months 2 to 3 (November 16, 2024 January 8, 2025)" has been changed to ". . . Months 2 to 6 (November 16, 2024 April 8, 2025)"
  - o "Actions To Be Taken in Months 4 to 12 (January 9 October 8, 2025)" has been changed to "... Months 7 to 12 (April 9 October 8, 2025)"
- A new subheading, "Actions Planned for Months 1 through 6 but Delayed" is provided to capture those actions that were intended to be completed in the first six months but that are still being worked on. This section replaces the "Actions Planned for Month 1 but Delayed" section of the "Month 1 Update (November 2024)".

While we recognize there is still more to be done, we are proud of the significant progress we've made and remain fully committed to continuing this important work. We hope this update facilitates ongoing partnership and collaboration with the Assembly and our stakeholders

Sincerely,

—24BDE35706F8421...

Sean Holland, P.E.
Alaska Department of Transportation and Public Facilities
Control Pagion Director

**Central Region Director** 

STATE OF ALASIA

Brad Coy, P.E., PTOE Municipality of Anchorage Municipal Traffic Engineer

# Multi-Agency Report: Taking Action to Prevent Roadway Deaths – *Month 6 Update (Apr. 2025)* Page 2 of 15

## Request #1: Immediately Install Improved Lighting

Actions Taken in the First Two Weeks (September 23 – October 8, 2024)

- Adjusted DOT&PF Maintenance and Operations staff schedules to begin winter schedule shift work earlier than usual to assess the lighting and fix any identified maintenance issues. (DOT&PF)
- Began working with an engineering consultant on a possible contract to assess lighting levels on four high-priority municipal roads identified in the AMATS Safety Plan and to provide recommendations for improvement. (MOA PM&E)
  - Bragaw Street (Northern Lights Boulevard to Glenn Highway)
  - Debar Road (Lake Otis Parkway to Airport Heights)
  - o Mountain View Drive (Commercial Drive to Bragaw Street
  - Lake Otis Parkway (Northern Lights Boulevard to 68th Avenue)

# Actions Taken in Month 1 (October 9 – November 15, 2024)

- Began evaluating lighting conditions for prioritized corridors across Anchorage. (DOT&PF and MOA) This task was originally intended to occur in Months 2 or 3, but it was moved up to capture light levels at priority locations prior to the first snowfall.
  - Recorded data on existing roadway lighting conditions on Muldoon Road north of DeBarr Road. (DOT&PF)
  - Executed task for engineering consultant to assess lighting on two roadways. (MOA)
    - DeBarr Road from Lake Otis Parkway to Airport Heights Drive
    - Bragaw Road from Northern Lights Blvd to Glenn Highway

## Actions Taken in Months 2 through 6 (November 16 – April 8, 2025)

- Performed additional data collection of lighting conditions for prioritized corridors across Anchorage and prepared preliminary findings. (DOT&PF and MOA)
  - Data were collected of existing roadway lighting conditions on sidewalks on Tudor Road east of Minnesota Drive and compared with the previously collected data on Muldoon Road north of DeBarr Road to evaluate the different lighting conditions present in both corridors. (DOT&PF) Initial results indicate:
    - The lowest light level was captured on Tudor Road at MacInnes Street but still meets national minimum light guidance for a "medium pedestrian" activity area.
    - All other locations met criteria for "high pedestrian" activity, which is comparable to high-density urban development.
    - Light levels near Tudor Road/Wright Street intersection (upgraded in 2022 by an HSIP project) is about five-times brighter than lowest level location (Tudor Road/MacInnes Street).
    - Staggered lighting on both sides of roadway was more uniform than onesided pole installations.

Multi-Agency Report: Taking Action to Prevent Roadway Deaths – *Month 6 Update (Apr. 2025)* Page 3 of 15

### Actions Planned for Months 1 through 6 but Delayed

Create a data collection plan for prioritized corridors listed in Attachment A – Action
Prioritization Table. (DOT&PF and MOA Traffic Engineering and PM&E) – Data has now been
collected on the top two priority corridors. Additional data collection will be considered
after better understanding how to use the current data.

- Prepare report in Summer 2025 that documents the data gathered and includes results and recommendations based on the evaluation of the system's lighting conditions across Anchorage in Winter 2024-2025 and Spring 2025. (DOT&PF and MOA)
  - Preliminary findings (provided in "Months 2 through 6" section) will be incorporated into a report. (DOT&PF)
  - Field condition survey and computer-generated lighting analysis is underway. Field measurements of light levels expected to occur in late April. (MOA)
    - DeBarr Road from Lake Otis Parkway to Airport Heights Drive
    - Bragaw Road from Northern Lights Blvd to Glenn Highway
- Prepare recommended action plan for advancing improved lighting projects. This could be HSIP project nominations, adding lighting to existing projects already underway, and addressing barriers to improving lighting where it is not immediately possible. (DOT&PF and MOA)
- Review lighting level standards in the Design Criteria Manual (DCM) with a focus on pedestrian-level lighting, consistent with the Vision Zero Action Plan. (MOA Traffic Engineering and PM&E)

# Request #2: Lower Speed Limits By At Least 10mph, Not to Exceed 35 mph On Major Roads

Actions Taken in the First Two Weeks (September 23 – October 8, 2024)

 Identified priority corridors (Attachment A – Action Prioritization Table) for lowering speed limits, and estimated implementation timeframes that account for required speed studies, signal timing changes, transit route service changes, and public outreach. (DOT&PF and MOA)

Actions Taken in Month 1 (October 9 – November 15, 2024)

- Began speed studies and public outreach for reducing speed limits along the two highest priority locations. (DOT&PF)
  - Tudor Road (C Street to Elmore Road)
  - Muldoon Road (DeBarr Road to Boundary Avenue)
- Began speed study and public outreach for reducing speed limits along currently active projects. (DOT&PF)
  - Elmore Road (Abbott Road to Dowling Road)
  - o Elmore Road (Dr. Martin Luther King Jr Avenue to Providence Drive)
- Met with the Federation of Community Councils (FCC) and created a plan for visiting community councils throughout Anchorage as part of the required public outreach process for changing speed limits. (DOT&PF) – Met with FCC Executive Director and have arranged presentation for Board of Delegates on October 10, 2024. Began meeting with individual community councils (see list in "Request #3" section).
- Obtained crowd-sourced data (INRIX), that uses vehicle metrics to show segment speeds, hard braking, hard turning, and near miss data through 2023. This data is being compiled and evaluated as part of each speed study currently being prepared. The MOA and consultants will also have access under the DOT&PF subscription to utilize the data sets going forward. (DOT&PF and MOA)

#### Actions Taken in Months 2 through 6 (November 16 – April 8, 2025)

- Completed draft speed study and public outreach for reducing speed limits along Elmore Road (currently active project), and submitted change order to reduce current 45MPH posted speed limit for one of the road segments, with the other two still under review (to be completed in Summer 2025): (DOT&PF)
  - o Elmore Road (Providence Drive to Dr. Martin Luther King Jr Avenue) 35MPH
  - o Elmore Road (Dr. Martin Luther King Jr Avenue to Dowling Rd) Under Review
  - Elmore Road (Dowling Road to Abbott Road) Under Review
- Met with additional community councils (total of 19) and the FCC Board of Delegates as part of the required public outreach process for changing speed limits. (DOT&PF and MOA)
- Obtained subscription to crowd sourced data (INRIX), that uses vehicle metrics to show segment speeds, hard braking, hard turning, and near miss data through 2023. This data is being compiled and evaluated as part of each speed study currently being prepared. The MOA and consultants have access under the DOT&PF subscription to utilize the data sets going forward. (DOT&PF and MOA)

Multi-Agency Report: Taking Action to Prevent Roadway Deaths – *Month 6 Update (Apr. 2025)* Page 5 of 15

# Actions Planned for Months 1 through 6 but Delayed

- Coordinate with MOA Public Transportation Department to evaluate how speed limit reductions would affect transit routes. (MOA) – Waiting until draft speed studies are completed and can provide more specific recommendations for transit-related assessment.
- Finalize speed limit reduction authorization on Spenard Road and coordinate with MOA Signals, MOA Paint & Sign, APD, and MOA Public Transportation Department to establish the earliest the posted reduction can take effect. (MOA Traffic Engineering) Reinitiating task now that INRIX data is available and DOT&PF has completed its first speed study (for Elmore Road), so that format and content can be consistent.
- Review municipal code and prepare local legislation to align Anchorage's default speed limits with state statute, particularly in relation to the State's 20 mph statutory speeds in business districts. (MOA Traffic Engineering and Law)

#### Actions To Be Taken in Months 7 to 12 (April 9 – October 8, 2025)

- Pending the outcome of the speed studies and public outreach process, proceed with speed limit reductions on the two priority roadway segments. Coordinate with MOA Signals on signal timing changes, DOT&PF or MOA Paint & Sign shop on sign fabrication and installation, APD on enforcement/education efforts, and People Mover on schedule changes needed to align with the slower travel times. (DOT&PF and MOA)
- Visit second round of community councils in order of priority as outlined in Attachment A Action Prioritization Table to discuss speed limit reductions and other safety improvements on next round of Anchorage streets. (DOT&PF)
  - Have contacted all Anchorage Bowl community councils to request time to jointly present Vision Zero Action Plan and the Municipality's Neighborhood Greenways program. Will continue to present to community councils as their agendas allow.
- Revise MOA's Design Criteria Manual (DCM) design speeds to account for land use context
  by acknowledging statutory speed limits exist and making roadways design decisions fit the
  context of surrounding land use and adopted planning documents. (MOA PM&E and Traffic
  Engineering)
- Evaluate land use in Anchorage's denser neighborhoods to identify which might also fit the Alaska Administrative Code definition of an "Business District," where the statutory speed limit of 20 mph would apply (13 AC 40.010). (MOA)

## Actions To Be Taken in Months 13 to 24 (October 9, 2025 – October 8, 2026)

 As part of the Bragaw Street SS4A grant award, perform the Speed Management Study to review speeds and recommend speed limit changes holistically for MOA and DOT&PF roads throughout the entire municipality. (MOA)

#### Related Request: Other Efforts to Reduce Travel Speeds

Actions Taken in the First Two Weeks (September 23 – October 8, 2024)

- Kicked off planning & design discussions between MOA and DOT&PF staff for Summer 2025 road diet pilot projects (reducing vehicular travel lanes) on DOT&PF roadways currently under contract with design consultants for pavement preservation projects. (DOT&PF and MOA)
  - Northern Lights Boulevard (Lake Otis Parkway to Forest Park Drive)
  - o I Street (3rd Avenue to 15th Avenue)
  - o L Street (3rd Avenue to 15th Avenue)
  - West Dimond Boulevard (Jewel Lake Road to Seward Highway)
  - Old Seward Highway South of O'Malley and Spur
- Created MOA work orders for the installation of speed feedback signs on municipally owned roads highest on the Action Prioritization Table – Attachment A. (MOA Traffic Engineering)
- Initiated change orders to add enhanced crosswalk striping and brush clearing on currently active projects. (DOT&PF)
  - Minnesota Drive (Spenard Road to 26th Avenue)
  - o Elmore Road (Tudor Road to Providence Drive)

## Actions Taken in Month 1 (October 9 – November 15, 2024)

- Installed additional speed feedback signs in key locations on MOA and DOT&PF roadways
  with high pedestrian crash history or identified in existing safety planning documents.
  DOT&PF deployed speed feedback carts in strategic locations and rotated them through
  the prioritized list. (DOT&PF and MOA)
  - Deployed speed feedback carts at two locations (rotation was not continued once snow began to fall). (DOT&PF)
    - Tudor Road (October 10 to 24, 2024)
    - Muldoon Road (October 10 to 24, 2024)
  - o Installed temporary speed feedback signs at two high-priority locations to calm traffic and collect speed data. (MOA)
    - 3<sup>rd</sup> Avenue, in advance of the Beans Café crosswalk
    - Lake Otis Parkway, north of Northern Lights Boulevard near the Airport Heights neighborhood
- Submitted new HSIP nominations on high priority corridors that include road diets, improved nonmotorized facilities, speed reductions, and/or speed feedback signs.
   (DOT&PF) – Nominations submitted to DOT&PF HQ for consideration. Letters of support from MOA and AMATS for relevant roadways requested by DOT&PF HQ.

#### Actions Taken in Months 2 through 6 (November 16 – April 8, 2025)

 Working with AMATS, submitted second round of HSIP nominations on high priority corridors that include road diets, improved nonmotorized facilities, speed reductions, and/or speed feedback signs. The following HSIP nominations were approved by DOT&PF HQ that specifically address infrastructure changes towards the goals of the Vision Zero Task Force: (DOT&PF) Multi-Agency Report: Taking Action to Prevent Roadway Deaths – *Month 6 Update (Apr. 2025)*Page 7 of 15

- A Street Road Diet (Fireweed Lane to 9<sup>th</sup> Avenue): Reduce vehicular through lanes from 3 lanes to 2 lanes. Add signalized intersection at 16<sup>th</sup> Avenue. Add multi-use pathway on west side of A Street from 16<sup>th</sup> Avenue to Chester Creek Trail with creek crossing. Evaluate reducing speed limit with capital project.
- Ingra Street/Gambell Street Road Diet (Fireweed Lane to 4<sup>th</sup> Avenue): Reduce vehicular through lanes to no more than 3 lanes, signing, striping, driveway consolidation. Evaluate reducing speed limit with capital project.
- Northern Lights Boulevard Road Diet (LaTouche Street to Lois Drive): Reduce vehicular through lanes, add crosswalks at major intersections, consolidate driveways, improve sidewalk on north side, introduce Leading Pedestrian Interval signalized intersection upgrades. Evaluate reducing speed limit with capital project.
- Mountain View Drive (Reeve Boulevard to Pine Street): Reduce vehicular lanes to no more than 3 lanes. Improve uncontrolled pedestrian crossings and add new pedestrian crossings, driveway consolidation, introduce Leading Pedestrian Interval signalized intersection upgrades.
- Vision Zero Implementation: Signing, Striping, Speed Feedback Signs to implement speed reduction recommendations from active speed studies for Tudor Road and Muldoon Road.
- Deploy "rest-on-red" signalization for late night hours at the following single 24 traffic signals to test performance and road user reaction prior to developing a plan to implement it at other Anchorage intersections. This signal is red for all vehicle and pedestrian directions during late night hours (9 p.m.12-6 a.m.) until a vehicle is detected as it approaches the intersection or a pedestrian activates the pedestrian push button.
   Pedestrian calls are served immediately when the signal is in the "all red" condition. (MOA)
  - o Arctic Boulevard/Fireweed Lane intersection since middle of March
- Coordinate travel demand model runs that consider system-wide impacts of lane reductions on streets throughout Anchorage. (AMATS, DOT&PF, and MOA)

## Actions Planned for Months 1 through 6 but Delayed

- Continue collaboration between MOA and DOT&PF preparing for Summer 2025 road diet
  pilot projects (reducing vehicular travel lanes) on DOT&PF roadways currently under
  contract with design consultants for pavement preservation projects (see prior list).
  (AMATS, DOT&PF, and MOA) Pilot projects are no longer proposed for 2025 due to
  resourcing challenges for both DOT&PF and MOA but discussions are ongoing regarding the
  incorporation of the lane reductions even without the pilot projects.
- Depending on results of current test locations, will deploy "rest-on-red" signalization for late night hours, potentially at the following 24 traffic signals. Late night crash data will also be analyzed to better plan for a priority intersection list, regardless of existing infrastructure, based on data and need. (MOA Traffic Engineering)
  - o Tudor Road (Boniface, Elmore, Lake Otis, and C St intersections)
  - C Street (Dimond, Dowling, and Tudor intersections) Rest-on-red timing plans have been prepared for the C Street/Dimond Boulevard and C Street/Tudor Road intersections and will be implemented as soon as weather conditions permit. These

Multi-Agency Report: Taking Action to Prevent Roadway Deaths – *Month 6 Update (Apr. 2025)* Page 8 of 15

intersections will allow for testing different vehicle detection types, and the results will help inform the plan for implementing this treatment at other intersections.

- Minnesota Drive (Northern Lights, Benson, and Spenard intersections)
- Northern Lights Boulevard (Boniface, Lake Otis, and Minnesota intersections)
- o 5th Avenue (Concrete, Reeve, and Airport Heights intersections)
- Lake Otis Parkway (Northern Lights, 36th, Tudor, and Abbott intersections)
- o 36th Avenue (Lake Otis and Spenard intersections)
- International Airport Road (Jewel Lake, Arctic, and Old Seward intersections)
- Raspberry Road (Jewel Lake and Northwood intersections)
- Abbott Road (Lake Otis and Elmore intersections)
- Bragaw Street (Mountain View intersection)

- Continue inter-agency collaboration and project revisions to incorporate lane reductions
   Summer road diet demonstration projects on several of the DOT&PF roadways currently
   under contract with design consultants for pavement preservation projects (list reproduced
   below see prior list). (DOT&PF and MOA)
  - I Street and L Street (3rd Avenue to 15th Avenue) The AMATS Policy Committee's April agenda includes an action item to decide whether to revise this pavement preservation project to include lane reductions and/or other safety improvements. If revised, this will delay the project while a revised scope is incorporated into the AMATS Transportation Improvement Plan (TIP) via amendment #4 as a named project.
  - Northern Lights Boulevard (Lake Otis Parkway to Forest Park Drive) Multiple projects (HSIP, sidewalk reconstruction, pavement preservation) are being considered for consolidation into a single project that would remove the right lane (north side of the road) and replace it with a buffer space and multiuse pathway.
  - West Dimond Boulevard (Jewel Lake Road to Seward Highway) The project team is exploring options for removing travel lanes on various segments of West Dimond Boulevard based on a combination of traffic volumes, storm drain infrastructure replacements, and other factors.
  - Old Seward Highway South of O'Malley and Spur Lane reductions are no longer being considered for this project.

Multi-Agency Report: Taking Action to Prevent Roadway Deaths – *Month 6 Update (Apr. 2025)*Page 9 of 15

# Request #3: Produce Public Education Campaign About Impact of Speed on Pedestrian Safety

Actions Taken in the First Two Weeks (September 23 – October 8, 2024)

- Initiated Pedestrian Safety Month Campaign across social media with the theme of "EVERYONE is a pedestrian." (DOT&PF)
- Began taking online orders for reflective tape on October 1, 2024, through the Center for Safe Alaskans as part of a State Highway Safety Office program and the AMATS Non-Motorized Safety Campaign, with over 4,400 requests received in the first week.
- Reviewed DMV Manual and recommended improved messaging regarding pedestrian safety and driver awareness of pedestrian yield law and scenarios (unmarked and marked crosswalks). (DOT&PF)
- Coordinated with the Executive Director of the Federation of Community Councils, began scheduling community council meetings in prioritized corridors where posted speed limits are being reviewed, and developed strategies for effectively spreading our messaging to the public. (DOT&PF)

### Actions Taken in Month 1 (October 9 – November 15, 2024)

- Scheduled meetings with community councils in every corridor identified in the AMATS Safety Plan and our Strategic Highway Safety Plan/Vulnerable Road User Plan to discuss speed limit reductions. (DOT&PF)
  - Meetings attended:
    - Spenard November 6, 2024
    - University Area November 6, 2024
    - Abbott Loop November 14, 2024
    - Fairview November 14, 2024
  - Additional community council meetings scheduled:
    - Mountain View November 20, 2024
    - Government Hill November 21, 2024
    - Airport Heights November 21, 2024
    - Turnagain December 5, 2024
    - Midtown December 12, 2024
    - Federation of Community Councils Board Meeting December 18, 2024
    - Old Seward/Oceanview January 8, 2025
- Launched a public education campaign to promote safe driving practices, including reminders that pedestrians have the legal right to cross at crosswalks, how higher speeds increase stopping distance, how tinted windows impair visibility, and the importance of not blocking crosswalks at signalized intersections, among other important safe driving behaviors. (DOT&PF) Created public service announcement video in conjunction with APD, DOT&PF, and the MOA (<a href="https://vimeo.com/1027086064">https://vimeo.com/1027086064</a>). Video emphasizes crashes are preventable, everyone has a role to play, Safe System Approach principles, and the MOA's Neighborhood Greenway initiative. The video is shared at community council meetings, followed by a presentation that covers the other topics listed in this task.

# Multi-Agency Report: Taking Action to Prevent Roadway Deaths – *Month 6 Update (Apr. 2025)* Page 10 of 15

- Responded to media requests covering this report and emphasized the importance of slowing down, observing the speed limit, being mindful of other users, and prioritizing safe behaviors on our roads. (DOT&PF and MOA) – Interviewed by Alaska Public Media and Alaska Newslink.
- Worked with the Alaska Department of Public Safety on statewide education and outreach and traffic safety and enforcement recommendations. (DOT&PF) – Submitted DMV Driver Manual edits to the Department of Administration. This was a joint effort with Department of Public Safety and SHSP action groups.

## Actions Taken in Months 2 through 6 (November 16 – April 8, 2025)

- Held and attended additional meetings with community councils throughout the Anchorage bowl. (DOT&PF and MOA Traffic Engineering)
  - Meetings attended:
    - Mountain View November 20, 2024
    - Government Hill November 21, 2024
    - Airport Heights November 21, 2024
    - Turnagain December 5, 2024
    - Midtown December 12, 2024
    - Federation of Community Councils Board Meeting December 18, 2024
    - Midtown January 8, 2025
    - Downtown January 8, 2025
    - Taku/Campbell Lake January 9, 2025
    - Campbell Park January 16, 2025
    - Hillside February 5, 2025
    - Basher February 13, 2025
    - Huffman/O'Malley February 20, 2025
    - Bayshore/Klatt February 20, 2025
    - Old Seward/Oceanview March 12, 2025
    - Russian Jack April 9, 2025
- AMATS Non-Motorized Safety Campaign has started expanding educational campaign
  initially focused on distracted driving to also target speeding and aggressive driving.
  Additionally, the campaign is providing reflective and brightly colored safety equipment to
  help cyclists and pedestrians be more visible. (MOA Traffic Engineering, AMATS)

#### Actions Planned for Months 1 through 6 but Delayed

Create media campaign informing public about new "rest-on-red" signalization practices.
 (MOA and DOT&PF) – Waiting until after initial test phase to determine best way to inform public.

- Create joint radio public service announcements. (DOT&PF and MOA)
- Determine whether to seek increased funding in order to expand the AMATS Non-Motorized Safety Campaign. (MOA Traffic Engineering, AMATS) – AMATS TIP Amendment #3 increased funding for campaign and is waiting for final approval by the Policy Committee.

## Request #4: Increase Enforcement of Traffic Violations Along Identified Corridors

Actions Taken in the First Two Weeks (September 23 – October 8, 2024)

- Prioritized enforcement activities have on high-speed arterials with pedestrian crash history, including fatal crashes in 2024. (APD Traffic Unit)
  - These areas include the Ingra Street/Gambell Street corridor, Muldoon Road, Tudor Road, and the A Street/C Street corridor.
  - Vehicular enforcement was targeted at speeding, red light violations, distracted driving, and screen use.
  - Pedestrian contacts were targeted at education of pedestrian rules of the road and safe crossing practices, as well as conducting enforcement action on intoxicated pedestrians in the roadway (AMC 8.35.410).

#### Actions Taken in Month 1 (October 9 – November 15, 2024)

• Continued targeted vehicular enforcement and pedestrian contacts by spending at least 50% of officer discretionary enforcement time shifts at same priority locations listed above. (APD Traffic Unit) – From October 8 to 31, the APD Traffic Unit issued 122 citations along the target corridors (equaling 45% of total citations issued for this time period).

#### Actions Taken in Months 2 through 6 (November 16 – April 8, 2025)

• Evaluated 2024 pedestrian related crash data and used results to identify priority enforcement actions and locations, where officers are spending at least 50% of discretionary enforcement time. (APD Traffic Unit) – Data supports continued efforts targeting the same previously-identified actions and locations.

#### Actions Planned for Months 1 through 6 but Delayed

• Explore whether to advance a proposal for a municipal charter amendment authorizing the use of Automated Traffic Enforcement, an action identified in the Municipality's Vision Zero Action Plan. (MOA) – Began discussions, including soliciting community input during community council visits, but more effort needed prior to deciding whether to pursue.

- Periodically release public service announcements reminding drivers to watch for pedestrians and for pedestrians to use safe crossing practices. (APD)
- Monitor 2025 pedestrian related crash data. Use results to identify priority enforcement actions and locations (including corridors where speed limits are being changed), where officers will spend at least 50% of discretionary enforcement time. (APD Traffic Unit)
- Conduct targeted vehicle/pedestrian enforcement if pedestrian safety grant is awarded by the Alaska Highway Safety Office to pay officers for overtime. (APD Traffic Unit)

## Related Request: Implement Other Vision Zero Action Items

Actions Taken in the First Two Weeks (September 23 – October 8, 2024)

- Performed pedestrian fatality crash site reviews with APD and diverse group of Road Safety Audit participants. (DOT&PF and MOA)
- Launched Community Safety Survey to catalog safety concerns submitted by public; this is a new long-term portal for submitting safety requests that will be cataloged and shared with planning and project staff. (DOT&PF)
  - o <a href="https://survey123.arcgis.com/share/2e5e6b1389fd4ae6977d57968153b7e3">https://survey123.arcgis.com/share/2e5e6b1389fd4ae6977d57968153b7e3</a>

#### Actions Taken in Months 2 through 6 (November 16 – April 8, 2025)

 Performed additional pedestrian fatality crash site reviews with APD and diverse group of Road Safety Audit participants for early 2025 pedestrian fatalities. (DOT&PF and MOA)

#### Actions Planned for Months 1 through 6 but Delayed

Develop formal Vision Zero Working Group with MOA, DOT&PF, and APD staff along with other community stakeholders to continue advancing Vision Zero initiatives. (MOA and DOT&PF) – MOA, DOT&PF, and APD have monthly meetings scheduled but have not yet expanded to invite other community stakeholders. The Municipality's Vision Zero Coordinator is currently serving as the Acting Traffic Signals Manager, but when full time staff attention can be returned to the Vision Zero Coordinator position, then additional efforts will be made to engage more with other community stakeholders.

#### Actions To Be Taken in Months 7 to 12 (April 9 – October 8, 2025)

- Consider "right turn on red" restriction policy for new construction projects. Evaluate
  additional restrictions beginning in Downtown Anchorage and extending out to other
  signalized intersections along the pedestrian priority corridors and others with right-turn
  crash histories. (MOA Traffic Engineering)
- Review signalized pedestrian crossing practices, including the "rest in walk" function for major streets that are not running coordinated and crosswalk protection against left turners at turn movements operating with flashing yellow arrows (permissive phasing not used when a pedestrian call is made). (MOA Traffic Engineering)
- Review safety concerns reported by public through the Partners in Safety website. (DOT&PF and MOA)

#### Actions To Be Taken in Months 13 to 24 (October 9, 2025 – October 8, 2026)

- As part of the Bragaw Street SS4A grant award, implement and develop policy for leading pedestrian intervals (LPIs), a signal timing technique to give pedestrians a head start providing for improved visibility and reducing vehicle conflicts
- Revise Alaska Traffic Manual Supplement to adopt 11<sup>th</sup> Edition MUTCD (anticipated adoption January 2026) with updated warrants for:
  - o Crosswalk markings, pedestrian crossing treatments, and enhancements
  - Signalized Intersection design elements to enhance conspicuity
  - Urban Safety Corridor selection criteria
  - Pedestrian Rights of Way Accessibility Guide (PROWAG) adoption

Multi-Agency Report: Taking Action to Prevent Roadway Deaths – *Month 6 Update (Apr. 2025)* Page 13 of 15

• As part of the Right-of-Way Management Strategy, review winter non-motorized maintenance prioritization across agencies to improve sidewalk accessibility during winter months. (MOA and DOT&PF)

## Related Request: Improve Staffing Levels and Resources

Actions Taken in the First Two Weeks (September 23 – October 8, 2024)

 Additional budget proposed by Mayor LaFrance for the MOA Traffic Engineering Department for Paint & Sign Shop staff, who will support a new initiative to prioritize non-motorized users on local neighborhood streets that connect to the multiuse trail network; these staff will also allow for greater capacity when considering how MOA could support DOT&PF's road diet pilot projects next summer. (MOA)

Actions Taken in Month 1 (October 9 – November 15, 2024)

- Filled the following position(s) within MOA Public Works and DOT&PF that are critical to roadway safety:
  - MOA Utility Engineer This engineer serves as a subject matter expert for street lighting, storm drain lift stations, and storm drain thaw systems; performs technical reviews on capital and private development projects; responds to inquiries from the public, other municipal agencies, and policy makers; and assists with the development of design criteria. This position has been vacant since August 2023 and attempts to recruit a qualified applicant have been unsuccessful. The position is currently being reclassified from Civil Engineer II to Civil Engineer III with the goal of attracting a qualified applicant. (MOA PM&E)

#### Actions Taken in Months 2 through 6 (November 16 – April 8, 2025)

- Execute a Memorandum of Agreement between DOT&PF and MOA to efficiently deliver the proposed activities, including work within DOT&PF rights-of-way and to transfer state and/or federal funds for associated work. (DOT&PF and MOA) Recently approved HSIP Vision Zero Implementation Project will utilize a Memorandum of Agreement between MOA and DOT&PF to effectively deliver portions of the project.
- Quantify resources needed to achieve commitments beyond this state fiscal year. State funds are required to operate DOT&PF infrastructure, so any recommendations will likely require additional funding to maintain the safety impacts beyond what is currently allocated this fiscal year. (DOT&PF) – State funding remains a challenge. Requested TORA funding from the AK Legislature for FY 2025 was below the line-item budget request submitted by DOT&PF to meet funding requirements for existing MOA TORA agreement.

#### Actions Planned for Months 1 through 6 but Delayed

- Fill positions within MOA Public Works and DOT&PF that are critical to roadway safety:
  - O MOA Traffic Signals Manager This engineer manages the MOA's Traffic Signals Group in the Traffic Engineering Department and oversees the shared MOA/DOT&PF traffic signal system. Filling this position will increase the number of available signal operations engineers available to re-time the traffic signals to accommodate the lower speed limits. The ability to perform the other signal timing safety adjustments will also be increased. This position has been vacant since August 2021 and attempts to recruit a qualified applicant have been unsuccessful. The salary range

- of this non-represented position needs to be substantially increased to attract qualified applicants. (MOA Traffic Engineering) Reclassification of position is under consideration.
- Central Region DOT&PF Highway Safety Improvement Program Engineer This position is critical to completing the data analysis and reporting requirements of the FHWA funded safety program. This position would coordinate with MOA Vision Zero position to comprehensively implement infrastructure improvements.
  (DOT&PF) Position remains vacant while reclassification process continues.
- Central Region Traffic Control Review Engineer This position will review private development and utility construction activities within the DOT&PF rights-of-way to ensure safe and consistent application of the updated Alaska Traffic Manual, including providing safe and accessible access through or around work zones for non-motorized user. The position is currently vacant and being reclassified and anticipated to take several months before advertisement. (DOT&PF) Position remains vacant while reclassification process continues.
