

Route H: Draft Bus Stop Plan

March 5, 2020

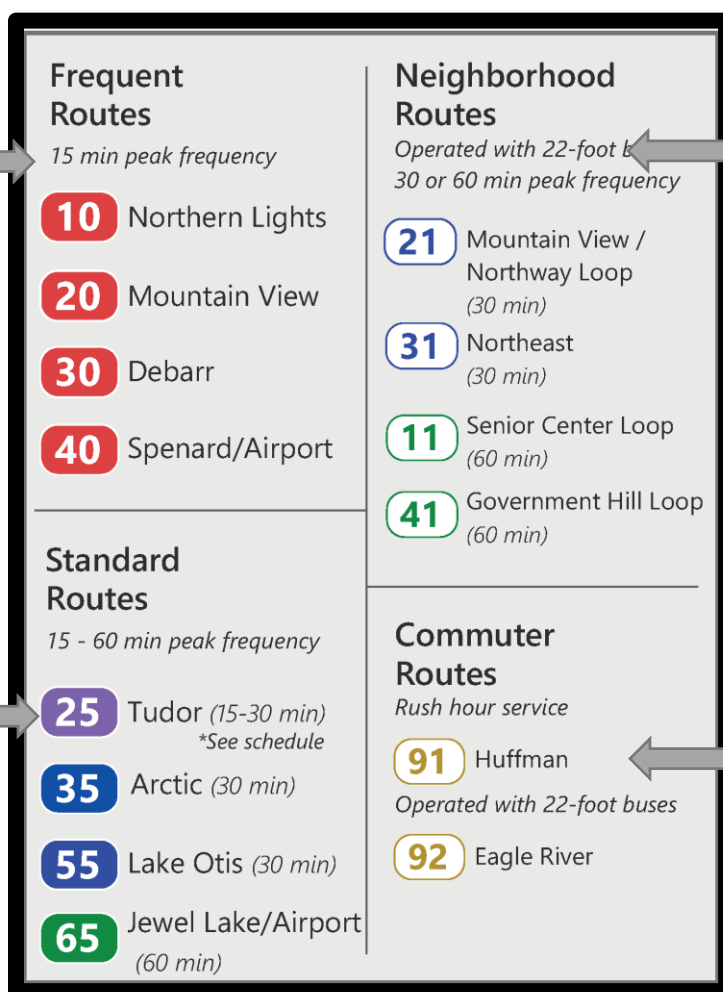

Route Numbers

The system redesign in 2017 brought new **route numbers**. The basis for the new numbering system gives insight into each of the route types.

15-minute routes are red & end in a zero. The routes 10, 20, 30, and 40 are all high frequency routes.

Standard routes end in a five. The routes 25, 35, 55, and 65 are standard routes ranging in frequency up to 60 minutes.

Neighborhood routes end in a one and are operated by 22-foot buses. The routes 11, 21, 31, and 41 are all neighborhood routes.

Commuter routes begin with a nine. The routes 91 and 92 are commuter routes.

Route H will be a standard route and we are recommending that it be called Route 85
