

## Fairview - Northeast Anchorage Realignment Options

The major function of this realignment option is to better connect Fairview and Northeast residents with a one seat ride to different parts of the city. (*This scenario can only be implemented if the Cross Town Route is implemented and there is no duplicative service in North Mountain View where Route 31 currently is.*)

**Routes 11 & 31:** Combining these routes connects the neighborhoods of Fairview, Airport Heights, Russian Jack, and Northeast, giving riders one seat ride opportunities from downtown to the Senior Activity Center, Alaska Regional Hospital, Cook Inlet Tribal Council and the Muldoon Transit Hub.

**Route 51:** Would not change and still provide service from the Muldoon Transit Hub to Centennial Village.
