
Development Services Department

Anchorage: Performance. Value. Results.

Purpose

Development Services works to facilitate development in accordance with municipal codes, municipal design criteria, and municipal construction standards. We protect public health through regulation of on-site water and wastewater systems. We respond to our customers seeking building, right-of-way, and land use permits or inspections or code enforcement information with open, friendly, cost efficient and effective service.

Core Services

- Enable property development through building and land use permitting;
- Ensure new construction meets municipal standards for protecting safety, public health, and environmental quality; and
- Enforce municipal codes to protect public assets such as rights-of-way and to promote clean and attractive neighborhoods.

Building Safety Division

Development Services Department

Anchorage: Performance. Value. Results.

Purpose

Building Safety Section accepts applications for building, land use, and private development permits; performs plan reviews for compliance with code, municipal design criteria, and municipal construction standards; issues permits; performs inspections to assure safe development; and protects public health and environmental quality through regulation of on-site water and wastewater systems.

Direct Services

- Process permit applications, provide cashier services, and issue permits;
- Verify that plans meet minimum code requirements through plan review;
- Inspect construction for compliance with plans and adopted building codes;
- Administer subdivision, improvement to public place, and development agreements in accordance with code;
- Process applications and issue permits for water and wastewater systems serving single family homes in accordance with Anchorage Municipal Code 15.55 (Water) and 15.65 (Wastewater); and
- Process certificates of on-site systems approval (COSA) for existing single family water and wastewater systems.

Accomplishment Goals

- Continue to provide excellent customer service by providing prompt and efficient permit processing, timely plan reviews, and same-day as requested construction inspection services;
- Manage the private development process effectively and efficiently;
- Ensure development-related infrastructure is designed and constructed according to municipal design criteria, standards, codes, and practices; and
- Provide on-site water and wastewater permitting, certification, training and enforcement consistent with goals of protecting public health and environmental quality.

Performance Measures

Progress in achieving goals will be measured by:

**Measure #1: Average number of minutes for first customer contact
(Permitting Mgt. Unit)**

Average Number of Minutes for 1 st Customer Contact			
Q1 2017	Q2 2017	Q3 2017	Q4 2017
12.12 minutes	14.29 minutes	21.48 minutes	
2,893 customers	4,446 customers	4,578 customers	
3.5 employees*	5 employees	4 employees**	
Q1 2016	Q2 2016	Q3 2016	Q4 2016
15.8 minutes	18.5 minutes	13.33 minutes	9.23 minutes
3,683 customers	4,533 customers	4,324 customers	3,279 customers
3 employees*	5 employees	5 employees	4 employees
2015 Qtr Avg	2014 Qtr Avg	2013 Qtr Avg	2012 Qtr Avg
14.25 minutes	19.20 minutes	22.34 minutes	19.15 minutes
4,201 customers	4,488 customers	4,049 customers	3,536 customers
5 employees	4 employees	4 employees	3 employees

*Q1 2017 began with 1 vacancy that increased to 2 vacancies mid-quarter. Recruitment is complete with 2 employees scheduled to begin in April. **Q3 2017, one position became vacant again, reducing staffing to 4 employees.

**Measure #2: Percent of first-time residential plan reviews completed within 4 business days
(Plan Review Unit)**

Percent of 1 st -Time Residential Reviews Completed within 4 Business Days			
Q1 2017	Q2 2017	Q3 2017	Q4 2017

89.3%	80%	100%	95%

¹Fourteen reviews in Q3 2017. Two were late: one due to a review backlog and the other due to late receipt of comments from another department.

²Twelve reviews in Q2 2017. Two were late: one was a day late due to late receipt of comments from Street Maintenance; other was a day late due to effort to resolve Traffic and Street Maintenance's comment with a design engineer.

³Sixteen reviews in Q2 2016. Three were late due to comments received late from other departments (Street Maintenance / Lighting / Traffic). Three were late due to paternity leave. The remaining four were late due to high workload for plan reviews and platting actions. Four of the first reviews were received within a five day time span in early May. First reviews require more time to complete than subsequent reviews.

⁴Sixteen reviews in Q3 2016. One review was 5 days overdue owing to late comments received from Street Lights / Street Maintenance. Two reviews were 1 day late and one was 3 days late due to heavy inspections workload.

Measure #6: Percent of Certificate of On-Site Approval applications reviewed within 3 business days (*On-Site Water & Wastewater Unit*)

Land Use Permitting & Enforcement Division Development Services Department

Anchorage: Performance. Value. Results.

Purpose

Protect the travelling public and improve the quality, useful life, and safety of the public rights-of-way within the Municipality of Anchorage.

Improve quality of life and ensure compatible land uses through effective zoning review and enforcement of Title 21, Land Use Regulations.

Provide assistance to general public and development community through review of facility licenses, administrative land use permits, and business development proposals and assign and maintain unique addressing and street names to ensure conformance with Anchorage's land use regulations.

Direct Services

- Inspect construction projects within municipal rights-of-way;
- Review plans and issue right-of-way permits on a timely basis;
- Investigate and resolve complaints regarding illegal usage of rights-of-way.
- Enforce Title 21, the Land Use Code;
- Perform final zoning inspections of completed construction projects;
- Conduct land use reviews (at request of property owner, developer, mortgage lender, etc.) to determine a parcel's zoning status, conformity with other land use regulations, and/or eligibility for grandfather rights;
- Issue administrative land use permits for bed and breakfast establishments, antenna towers and attachments, snow disposal sites, adult entertainment establishments, and premises where minors are not allowed;
- Review and inspect day care centers, animal facilities (such as kennels), and businesses selling alcoholic beverages for compliance with municipal land use regulations when those businesses seek new licenses or renewals; and
- Assign addresses to new construction and work to eliminate duplicate street names.

Accomplishment Goals

- Protect the travelling public and the municipal rights of way, the largest single asset of the Municipality of Anchorage at +\$10 billion;
- Respond to land use code complaints within established timeframes;
- Complete final zoning inspections same day as requested;
- Provide timely and accurate services for:
 - Land use reviews/determinations;
 - Administrative land use permits;
 - Business facility reviews and inspections;
 - Assignment of new addresses; and
 - Maintenance of GIS map data layers for roads and addresses; and
- Continue to make progress eliminating duplicate street names to ensure the uniqueness of each address, thereby improving E911 response times.

Performance Measures

Progress in achieving goals will be measured by:

Measure #9: Percent of inspections of permitted construction completed same day to ensure installation compliance w/ MOA standards & specifications (ROW Enforcement)

Percent of Inspections Completed Same Days as Requested				
Month/Year	# of ROW Officers	Requested	Accomplished	Percent
Jan 17	7	26	26/718	100%
Feb 17	7	29	29/77	100%
Mar 17	7	19	18/174	100%
Apr 17	7	34	34/99	100%
May 17	7	82	82/302	100%
Jun 17	7	148	148/623	100%
Jul 17	7	97	97/413	100%
Aug 17	7	126	126/728	100%
Sep 17	7	123	123/552	100%
Oct 17				
Nov 17				
Dec 17				
Jan 16	7	26	26 / 759	100%
Feb 16	7	45	45 / 128	100%
Mar 16	7	24	24 / 251	100%
Apr 16	7	38	38 / 157	100%
May 16	7	276	276 / 495	100%
Jun 16	7	216	216 / 424	100%
Jul 16	7	267	267 / 653	100%
Aug 16	7	263	263 / 753	100%
Sep 16	7	164	164 / 718	100%
Oct 16	7	73	73/874	100%
Nov 16	7	41	41/298	100%
Dec 16	7	13	13/139	100%
Annual Totals – Prior Years				
2015	7	1,346	1,346 / 7,874	100%
2014	6.6	3,886	3,886 / 14,751	100%
2013	6	1,952	1,952 / 6,720	100%
2012	7	1,309	1,309 / 6,512	100%
2011	7	1,035	1,035 / 3,189	100%

In the "Accomplished" column inspections are reported in two categories, separated by a "/." The first number represents the number of inspections accomplished same day as requested and is used to compute the percent result. The second number is the total number of inspections performed for the month. The larger number for total inspections reflects on how a single job may require numerous inspections. Examples of inspection types are: initial, progress (there could be 4-6 or more progress inspections), final, and warranty.

Measure #10: Percent of all complaints of illegal uses within the rights-of-way inspected within one working day of receipt. (Right-of-Way Enforcement Section)

Performance Measure Methodology Sheet
Building Safety Section
Development Services Department

Measure #1: Average number of minutes for first customer contact. (*Permitting Management Unit*)

Type

Effectiveness

Accomplishment Goal Supported

Continue to provide excellent customer service by providing prompt and efficient permit processing, timely plan reviews, and same-day as requested construction inspections.

Definition

Measure the efficiency of the permit management process by focusing on prompt, efficient customer service.

Data Collection Method

Data is collected by logging in the time each customer enters the processing area and stopping it with the first customer contact by a permit technician.

Frequency

The data is collected continuously, compiled weekly and analyzed weekly and monthly.

Measured By

The permit technicians will maintain a continuous log of customers served using the measurement criteria. They will compile customer service information at the end of each day and week and store the data in an Excel spreadsheet. The permit management supervisor will compile and analyze the statistics weekly and monthly.

Reporting

The permit management supervisor will create and maintain a weekly and monthly report in Excel from the data received from the permit technicians. The information will be displayed numerically and graphically.

Used By

The permit management supervisor and engineering services manager will use the information to gain a clear understanding if customer service standards are effective. The report will be presented to the deputy director and director at staff meetings and the public via the municipal website.

Performance Measure Methodology Sheet
Building Safety Section
Development Services Department

Measure #2: Percent of first-time residential plan reviews completed within 4 business days. (*Plan Review Unit*)

Type

Effectiveness

Accomplishment Goal Supported

Continue to provide excellent customer service by providing prompt and efficient permit processing, timely plan reviews, and same-day as requested construction inspections.

Definition

Measure the efficiency of the permit management process by focusing on fluctuations in the time of completing initial residential plan review.

Data Collection Method

Data is collected automatically by the permit processing software by logging in the time each construction plan is routed for review and stopping it when the review is completed.

Frequency

The data is collected continuously, compiled weekly and analyzed weekly and monthly.

Measured By

The permit technicians and plan reviewers will enter accurate data into the permit processing system. The permit processing software is programmed to maintain and compile data of when the plans were routed and reviewed using measurement criteria. The engineering services manager will compile and analyze the statistics weekly and monthly.

Reporting

The engineering services manager will analyze the collected data weekly and monthly. The information will be displayed numerically and graphically.

Used By

The permit management supervisor and engineering services manager will use the information to gain a clear understanding if service is being delivered to established standards. The report will be presented to the deputy director and director at staff meetings and the public via the municipal website.

Performance Measure Methodology Sheet
Building Safety Section
Development Services Department

Measure #3: Percent of construction inspections completed same day as requested.
(Building Inspection Unit)

Type

Effectiveness

Accomplishment Goal Supported

Continue to provide excellent customer service by providing prompt and efficient permit processing, timely plan reviews, and same-day as requested construction inspections.

Definition

Measures the efficiency of service delivery of inspections by analyzing the ratio of inspections performed the same day as requested.

Data Collection Method

The calculation is performed by dividing number of inspections performed the same day as requested by the number of requested inspections and is expressed as a percentile.

Frequency

The data is collected continuously, compiled weekly and analyzed weekly and monthly.

Measured By

Initial data is collected automatically by proprietary software and downloaded via a paper system into an inspection report. Each inspector manually enters the inspection request prior to leaving for the day's work and then enters the inspection results upon return. The data will be evaluated by comparing the number of inspections performed by the number of inspections requested for that time period, expressed in a percentile. *Note: Upon implementation of Hansen software in fall 2010 this will be an automated, "real time," process saving thousands of dollars via employee time saved.

Reporting

The chief of inspections will analyze the collected data weekly and monthly. The information will be displayed numerically and graphically.

Used By

The chief of inspections and deputy director will use the information to gain a clear understanding if service is being delivered to established standards. The report will be presented to the director at staff meetings and the public via the municipal website.

Performance Measure Methodology Sheet
Building Safety Section
Development Services Department

Measure #4: Percent of life safety building code complaints investigated within one business day and percent of all code abatement service requests initially investigated same week as received. (*Code Abatement Unit*)

Type

Effectiveness

Accomplishment Goal Supported

Protect the public by enforcing the building code by investigating code abatement service requests about structures that are unsafe or otherwise non-compliant with the building code and construction occurring without proper permits.

Definition

Tracks the number of code abatement service requests received each quarter.

Data Collection Method

Each code abatement service request is entered into the Hansen code compliance module and resolution of each request is recorded.

Frequency

The data is collected continuously.

Measured By

Running a report in the Hansen database to calculate the number of code abatement requests processed each quarter.

Reporting

The Chief of Inspections will analyze the collected data weekly and monthly.

Used By

The Chief of Inspections and Deputy Director will use the information to gain a clear understanding if service is being delivered to established standards. The report will be presented to the director at staff meetings and the public via the municipal website.

Performance Measure Methodology Sheet
Building Safety Division
Development Services Department

Measure #5: Percent of review responses provided to a development team within 15 business days of a developer's submittal. (*Private Development Unit*)

Type

Effectiveness

Accomplishment Goal Supported

Manage the private development process effectively and efficiently.

Definition

Measures the effectiveness and efficiency of the private development process by focusing on fluctuations in the time plan submittal comments are reviewed and compiled.

Data Collection Method

Data is collected manually and entered into an Excel spreadsheet by logging in the date a complete plan set and a deposit are received and the time review responses for the submittal are sent to a development team.

Frequency

The data is collected continuously, compiled weekly and analyzed weekly and monthly.

Measured By

Private development staff will enter accurate data into the Excel spreadsheet and will maintain and compile data of when submittals (plans and deposits were routed) and when submittal comments are sent to a development team using the measurement criteria. The private development manager will compile and analyze the statistics weekly and monthly.

Reporting

The private development manager will analyze the collected data weekly and monthly. The information will be displayed numerically and graphically.

Used By

The private development manager and deputy director will use the information to gain a clear understanding if service is being delivered to established standards. The report will be presented to the deputy director and director at staff meetings and the public via the municipal website.

Building Safety Section
Development Services Department

Measure #6: Percent of Certificate of On-Site Approval applications reviewed within 3 business days. (*On-Site Water and Wastewater Unit*)

Type

Effectiveness

Accomplishment Goal Supported

Provide on-site water and wastewater permitting, certification, training, and enforcement consistent with goals of protecting public health and environmental quality.

Definition

Measure the effectiveness and efficiency of the on-site process by focusing on fluctuations in the time of completing certificate of on-site approval (COSA) reviews.

Data Collection Method

The calculation is performed by dividing numbers of COSA applications received within a designated time frame and completed within 3 business days, by the number of applications received within the same designated time frame, and is expressed as a percentile.

Frequency

The data is collected continuously, compiled weekly and analyzed weekly and monthly.

Measured By

The plan reviewers will enter accurate data into the permit processing system. The permit processing software is programmed to and will maintain and compile data of when the plans were routed and reviewed using the measurement criteria. The engineering services manager will compile and analyze the statistics weekly and monthly.

Reporting

The engineering services manager will analyze the collected data weekly and monthly. The information will be displayed numerically and graphically.

Used By

The engineering services manager and deputy director will use the information to gain a clear understanding if service is being delivered to established standards. The report will be presented to the director at staff meetings and the public via the municipal website.

Development Services Department

Measure #7: Percent of inspection report reviews completed within 3 business days.
(On-Site Water and Wastewater Unit)

Type

Effectiveness

Accomplishment Goal Supported

Provide on-site water and wastewater permitting, certification, training, and enforcement consistent with goals of protecting public health and environmental quality.

Definition

Measure the effectiveness and efficiency of the on-site process by focusing on fluctuations in the time of completing inspection report reviews.

Data Collection Method

The calculation is performed by dividing numbers of inspection reports received and completed within a designated time frame by the number of requests received within the same designated time frame, and is expressed as a percentile.

Frequency

The data is collected continuously, compiled weekly and analyzed weekly and monthly.

Measured By

The reviewer will enter accurate data into the permit processing system. The permit processing software is programmed to and will maintain and compile data of when the inspection was requested and the initial inspection performed. The engineering services manager will compile and analyze the statistics weekly and monthly.

Reporting

The engineering services manager will analyze the collected data weekly and monthly. The information will be displayed numerically and graphically.

Used By

The engineering services manager and deputy director will use the information to gain a clear understanding if service is being delivered to established standards. The report will be presented to the director at staff meetings and the public via the municipal website.

Performance Measure Methodology Sheet
Building Safety Section
Development Services Department

Measure #8: Percent of on-site permit application reviews completed within 3 business days. (*On-Site Water and Wastewater Unit*)

Type

Effectiveness

Accomplishment Goal Supported

Provide on-site water and wastewater permitting, certification, training, and enforcement consistent with goals of protecting public health and environmental quality.

Definition

Measure the efficiency of the on-site process by tracking the number of permit application reviews within three business days.

Data Collection Method

The calculation by comparing dates for receipt of new applications to dates when permit reviews were completed.

Frequency

The data is collected continuously and updated quarterly.

Measured By

The reviewer will enter accurate data into the permit processing system. The permit processing software is programmed to and will maintain and compile data of when permit application was received and when the review was completed.

Reporting

Community Development will include results in its regular performance measure reports.

Used By

The Engineering Services Manager and Deputy Director will use the information to gain a clear understanding if service is being delivered to established standards. The report will be presented to the Director at staff meetings and the public via the municipal website.

Performance Measure Methodology Sheet
Land Use Permitting & Enforcement Division
Development Services Department

Measure #9: Percent of inspections of permitted construction completed the same day to ensure installation compliance with MOA standards and specifications. (*Right-of-Way Enforcement Section*)

Type

Effectiveness

Accomplishment Goal Supported

Protect traveling public and municipal rights-of-way as Anchorage's largest single asset valued at more than \$10 billion.

Definition

Measure the effectiveness and efficiency of the Right-of-Way Unit by focusing on fluctuations in the frequency of performing construction inspection in the rights-of-way.

Data Collection Method

The calculation is performed by dividing number of inspection requests received and completed within a designated time frame by the number of requests received within the same designated time frame, and is expressed as a percentile.

Frequency

The data is collected continuously, compiled weekly and analyzed weekly and monthly.

Measured By

The right-of-way inspector will enter accurate data into the permit processing system. The permit processing software is programmed to and will maintain and compile data of when the inspection was requested and the initial inspection performed. The lead right of way enforcement officer will compile and analyze the statistics weekly and monthly.

Reporting

The lead right-of-way enforcement officer will analyze the collected data weekly and monthly. The information will be displayed numerically.

Used By

The lead right-of-way enforcement officer and chief of code enforcement will use the information to gain a clear understanding if service is being delivered to established standards. The report will be presented to the director at staff meetings and the public via the municipal website.

Performance Measure Methodology Sheet
Land Use Permitting & Enforcement Division
Development Services Department

Measure #10: Percent of all complaints of illegal uses within the rights-of-way inspected within one working day of receipt. (*Right-of-Way Enforcement Section*)

Type

Effectiveness

Accomplishment Goal Supported

Protect traveling public and municipal rights-of-way as Anchorage's largest single asset valued at more than \$10 billion.

Definition

Measures the effectiveness and efficiency of service delivery of inspections by analyzing the ratio of inspections performed compared to the established time lines based on life/safety or impact on the community.

Data Collection Method

The calculation is performed by dividing numbers of code enforcement inspections performed within the established timelines by the number of required code enforcement inspections and is expressed as a percentile.

Frequency

The data is collected continuously, compiled weekly and analyzed weekly and monthly.

Measured By

Data is collected automatically by Hansen software and can be extracted by Crystal Report.

Reporting

The lead right-of-way enforcement officer will analyze the collected data weekly and monthly. The information will be displayed numerically.

Used By

The lead right-of-way enforcement officer and chief of code enforcement will use the information to gain a clear understanding if service is being delivered to established standards. The report will be presented to the deputy director at staff meetings and the public via the municipal website.

Performance Measure Methodology Sheet
Land Use Permitting & Enforcement Division
Development Services Department

Measure #11: Percent of land use enforcement complaints inspected within one working day of receipt. (*Land Use Enforcement Section*)

Type

Effectiveness

Accomplishment Goal Supported

Respond to land use code complaints within established timeframes.

Definition

Measures the effectiveness of service delivery of inspections by analyzing the ratio of inspections performed compared to the established timelines based on life/safety or impact on the community.

Data Collection Method

The calculation is performed by dividing numbers of code enforcement inspections performed within the established timelines by the number of required code inspections and is expressed as a percentile.

Frequency

The data is collected continuously, compiled weekly and analyzed weekly and monthly.

Measured By

Data is collected automatically by Hansen software and can be extracted using Crystal Reports.

Reporting

The lead land use enforcement officer will analyze the collected data weekly and monthly. The information will be displayed numerically.

Used By

The lead land use enforcement officer and chief of code enforcement will use the information to gain a clear understanding if service is being delivered to established standards. The report will be presented to the deputy director at staff meetings and the public via the municipal website.

**Performance Measure Methodology Sheet
Land Use Permitting & Enforcement Division
Development Services Department**

**Measure #12: Percent of final zoning inspections completed same day as requested.
(Land Use Enforcement Section)**

Type

Effectiveness

Accomplishment Goal Supported

Perform final zoning inspections of completed construction projects.

Definition

Measures the effectiveness of service delivery of inspections by analyzing the ratio of inspections performed compared to the established timelines based on life/safety or impact on the community.

Data Collection Method

The calculation is performed by dividing numbers of final zoning inspections performed the same day as requested by the number of requested inspections and is expressed as a percentile.

Frequency

The data is collected continuously, compiled weekly and analyzed weekly and monthly.

Measured By

Initial data is collected automatically by proprietary software and downloaded via a paper system into an inspection report. Each inspector manually enters the inspection request prior to leaving for day's work and enters inspection results upon return. The data will be evaluated by comparing number of inspections performed by number of inspections requested for that time period, expressed as a percentile.

Reporting

The lead land use enforcement officer will analyze the collected data weekly and monthly. The information will be displayed numerically.

Used By

The lead land use enforcement officer and chief of code enforcement will use the information to gain a clear understanding if service is being delivered to established standards. The report will be presented to the deputy director at staff meetings and the public via the municipal website.

PVR Measure WC: Managing Workers' Compensation Claims

Reducing job-related injuries is a priority for the Administration by ensuring safe work conditions and safe practices. By instilling safe work practices we ensure not only the safety of our employees but reduce the potential for injuries and property damage to the public. The Municipality is self-insured and every injury poses a financial burden on the public and the injured worker's family. It just makes good sense to WORK SAFE.

Results are tracked by monitoring monthly reports issued by the Risk Management Division.
